

VIRGINIA TELEPHONE RATES SEPTEMBER 1, 1952

LEAGUE OF VIRGINIA MUNICIPALITIES
905 TRAVELERS BUILDING
RICHMOND 19, VIRGINIA

FOREWORD

The material contained in this report is presented in abstracted form, and is designed to provide a general summary of telephone rates in Virginia. Needless to say, most of the rules and regulations, and the many details of the rate schedules could not be included in a report of this size, but are available to any interested person in the offices of the State Corporation Commission. However, the most important provisions have been stated briefly. No information was available for some of the smaller exchanges, but all major exchanges are represented in this summary.

It must be borne in mind that utility rates are constantly changing, and it is possible that already since the publication of this report, certain changes have been made by some companies. Rates contained in this report were abstracted from the records of the State Corporation Commission as of June 10, 1952.

While these data will serve for a general comparison of telephone rates, it is recommended that for a detailed investigation, records on file with the State Corporation Commission be consulted to insure absolute accuracy and to obtain information as to any changes in rates, which take place frequently.
